Nature-Reserve Tennenloher Forst

The Nature-Reserve Tennenloher Forst is located near the city of Erlangen, closed to Nürnberg. The area of 934 ha is part of the big Nürnberg wooden area. After world war II it was used by the US-army as military-area. 1994 it was elected as Nature-Reserve IUCN class IV. It´s one of the biggest sand-ecosystems in southern Germany. It contains 1600 different animals and plants. Destination is to keep a lot of open areas cause some of the populating animals need this to survive. To realize this since 10 years there is a large number of wild living Przewalski-horses who grazing the area free and avoid the totally closing of the areas by bushes.

I made the proposal to take up Tennenloher Forst in the DLFF-listing in 2012 where the first extension with Nature-Reserves happened. Similar like with the second-area around Nürnberg DLFF-175 at first there was no activity at all. Later the year then the first small log for a portable-operation appeared. One year later the second one arrived however both together included just 15 contacts. So DLFF-172 was from all activated DLFF-areas the rarest one, just filling the needs of 0,04 percent of the active

Nature-Reserve Tennenloher Forst

WWFF-hunters.

When I was on a short holiday-trip to Nature-Park Altmühltal I decided to give the area a short visit on the return-way. However weather was terrible on this day. We were more swimming home than driving home. The weather in Altmühltal also brought up to the decision to drive home earlier than originally planned. So we arrived around 1100 UTC in Tennenloher Forst and in extensive rainfalls we build up the antenna much faster and bit lower than usual because not so funny outside.

Unfortunately around this time we missed a lot of them which needed to be in work. Af-

ter about 1,5 hours of operating-time with 140 contacts we built done again everything under extensive rainfalls and were ready to swim back home on the fast-track which was as usually totally full in this area. So not exactly what I had planned but anyway could raise the stations who worked DLFF-172 by 900 percent. So there is more than enough for the hams of Nürnberg to do, to keep the world with this multiplier supplied. So thanks to all who made it into the log for calling. Hope to work you from anywhere.
