

Activation Nature Park Frankenwald DLFF-060 07.may 2011

In our last year planning we had also the idea to be active from nature park Frankenwald. However the season was so fast over and so it was a part from our 2011-planning. So I started at

Manfred DF6EX handing out DLFF060 on 20+40 meters

friday, april 29th in the area with my xyl to find a location for this activity. When we were back from the tour, I got the information that Klaus DL1ASF will be active from DLFF-060 at april, 30. After his activation we talked about his result and for a moment we were in doubt but then decided to make also an activation from there one week later. So we had a bit mixed feelings when we started at may 07 at 0430utc

from home. Our team consisted by Günther DC2RK who offers us for all activities his valuable trailer, generator and is mainly responsible that all our operations till today were so successful. Xaver DK4RM manned the 30/17-meter station, Josef DO6RZ gave out the counter in

Xaver DK4rm on 30/17 meters and Josef DO6RZ in PSK31

PSK and Manfred DF6EX on 40/20-meter. Our main-target was to hand out DLFF-060 especially in CW. When we arrived in the park-area on a large parking-place near Marktlegast with a clear shot to all directions we installed the double-dipoles 8 meters up between the trees. Stations were an FT2000D, FT990 and FT950. Our first contact was with EW6AF at 0658UTC. The beginning was a bit strange, no interest on 20meters. So at first we thought that it will be a very heavy run. But then we moved and especially 40 meters offered a good QSO-rate. Our best hour was with 162 QSO. We had a beautiful sunny day and the weather was nearly perfect. Our time-table was as usual around five hours, so we closed the at 1137 UTC with DL1RMJ made it as the last

Günther DC2RK relaxing after a well-done job

station in our log. The final result showed 629 contacts in the log. Altogether 584 different stations got the DLFF-060 counter from us. Also our main-target could be well fulfilled with 60% CW-contacts. 37,5% of the QSO were made in SSB and 2,5% in PSK31. Thanks to all stations who called us and made this operation again a success.

Our complete arrangement in DLFF-060 with beautiful nature

and in german at
<http://www.u23.de>

All contacts will be uploaded as usual to the WFF-database.

All contacts will be confirmed with a special DA0CW-WFF-QSL-card from our QSL-manager Heinz DL7RAG.
